IMPORTANT NOTIFICATION

International application No.

PCT/US03/26088

International filing date (day/month/year)

19 August 2003 (19.08.2003)

Priority date (day/month/year)

19 August 2002 (19.08.2002)

Applicant

E.I. DU PONT DE NEMOURS AND COMPANY

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the *PCT Applicant's Guide*.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed invention is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/US03/26088

Box No. I Basis of the report

1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
- ☐ This report is based on translations from the original language into the following language _____, which is the language of a translation furnished for the purposes of:
- ☐ international search (under Rules 12.3 and 23.1(b))
- ☐ publication of the international application (under Rule 12.4)
- ☐ international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the elements of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report)*:
- ☒ the international application as originally filed/furnished
- ☒ the description:
- pages 1-25 _____ as originally filed/furnished
- pages* NONE _____ received by this Authority on _____
- pages* NONE _____ received by this Authority on _____
- ☒ the claims:
- pages 26-30 _____ as originally filed/furnished
- pages* NONE _____ as amended (together with any statement) under Article 19
- pages* NONE _____ received by this Authority on _____
- pages* NONE _____ received by this Authority on _____
- ☐ the drawings:
- pages _____ as originally filed/furnished
- pages* _____ received by this Authority on _____
- pages* _____ received by this Authority on _____
- ☐ a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3. ☐ The amendments have resulted in the cancellation of:
- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/figs _____
- ☐ the sequence listing (*specify*): _____
- ☐ any table(s) related to the sequence listing (*specify*): _____
4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/figs _____
- ☐ the sequence listing (*specify*): _____
- ☐ any table(s) related to the sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

2. Citations and Explanations (Rule 70.7)

Claims 1-7 lack an inventive step under PCT Article 33(3) as being obvious over Kobo et al. (US 5,229,473 A). Regarding the limitation of parent Claim 1, Kobo et al. disclose a method for the production of a fluorine-containing copolymer comprising at least one fluoroolefin and at least one cyclic unsaturated compound represented by formulas (I) and (II). Although R1 to R10 can be the different and selected from a hydrogen atom, a halogen atom, a hydrocarbon group or a substituted hydrocarbon group, Kobo's formula (I) only read on the polycyclic main structure but is silent about the claimed requirement of R1 to R12 substituents as OH or ester group being needed. In a close examination, Kobo has disclosed attachment of such required polar groups of -OH, -COOH and -COOCH3 onto the hydrocarbon ring compound or added as a third monomer (column 6, line 42-68). The advantage is the existence of such a polar substituent would allow the copolymer to be cured by isocyanate, melamine, etc. (abstract, line 1-30; column 1, line 65 - column 2, line 60; column 2, line 1-67; column 6, line 42-68). Therefore, the skill artisan would make the obvious connection to add the claimed polar group(s) such as hydroxyl, carboxylic acid, and ester on R1-R10, or using as a third monomer to prepare the claimed copolymers more useful as a photoresist due to the crosslinking mechanism.

Claims 8-28 lack an inventive step under PCT Article 33(3) as being obvious over Kobo et al. (US 5,229,473 A) in view of Allen et al. (US 5,665,527). Regarding the limitation of Claims 8-28, Kobo is silent about using acrylic monomer as an additional monomer, using the claimed fluoroalcohol or protected fluoroalcohol groups as well as applying the copolymers in the area of photoresist. Allen et al. teach all the limitations of Claims 8-28 in preparing the claimed fluoropolymers for such application (column 3, line 34 - column 4, line 21). Therefore, the skill artisan would make the obvious connection to add the claimed acrylic monomer, or using a monomer having fluoroalcohol or protected fluoroalcohol groups on the cyclic alkenes to prepare the claimed copolymers useful as a photoresist.

Applicants has argued that Kobo does not teach or fairly suggest any of R1 to R10 can be either OH or -O2C-R, new rejections based on the same references are thereby applied.

In conclusion, it would be obvious to a person skilled in the art to arrive at the claimed invention with knowledge from the cited documents. In accordance with the arguments above, the invention claimed in Claims 1-28 is not inventive; it is considered to involve an novel step, and it is considered to have industrial applicability.
